Explanation of what exactly is 'Pret a Jouer' (RTP) Ready to Play

1. Except for dislodging in transport of the Sound Post, all instruments have been carefully set up at the luthier's bench or factory production-line to give optimum performance from the start.
2. **The bridge, string heights, fingerboard, neck, post, pegs, button and tail-piece are all precisely fitted at the luthiers' bench** to the instruments guidelines and build specification. **Bridges are always a high quality brand** and on the higher models, **often a well known set of strings are fitted as standard**. The overall look function and secureness are tested before it can pass QC Inspection and be packed carefully for shipping. A traceable quality control procedure will be in place from you/me to the makers' bench (mfr'd batch) should any fault owing to a maker's discrepancy have occurred, but the aim is for a factory/luthier hand-made faultless instrument.
3. I am also passionate about a good well set up beginner's instrument - 'Startifie' laminated range or the 'Etudiante - E4' here, that can only be prepared economically back at the makers' factory. Nothing less other than 'RTP' well set up will be accepted by me, my close cooperation with the preferred exclusive maker will guarantee joyful success for both the beginning player and teacher - **'Pret a Jouer ? ! - Voila ! - Let's Play!!!'**
